PERSONAL PROJECTS

Portfolio Website (12/2022 - 01/2023)

- I have Used React js and tailwind css to develop this portfolio website and it's a fully responsive for every device.
- In this application one can read about me and my technical skills the project i have completed and live demo and source code of all the project
- I have also applied smooch scroll to move different different components , also anyone can download my resume through download button.
- I have also created the contact form so any can reach out to me easily i have used form.io to create this contact form.
- Live Demo-<https://ajayvarmaportfolio.netlify.app/>

Inshorts-clone(News application) (11/2022 - 01/2023)

- This is an individual project It is a full fledge mern Stack application I have used React js for user interface and for the backend i have used node js express js and mongodb is used for the database.
- I have used material ui for front-end design in this application user can access latest news I have used mongoose for the connection.
- Github link-> <https://github.com/Ajay1552varma/inshorts-news>

Expense Tracker Application (12/2022 - 01/2023)

- I have created this application using react.js and material ui
- In this Expense Tracker application user can add their expense delete the particular expense and calculate the expenditure and earning
- Live Demo - <https://expencc-tracker11.netlify.app/>

CURD Application (11/2022 - 12/2022)

- This is an individual project I have developed this application using React js and react bootstrap.
- In this application one can perform all the basic and most useful operation which Read the data, delete all the data , Update the data present in the table and create the data , also user can switch between dark mode and light mode through toggle button I have used react bootstrap table to render all the data on the screen.
- Live Demo-> <https://react-curd15.netlify.app/>

CERTIFICATES

Data Structures and Algorithms issued by
geekforgeeks. (06/2020 - 08/2020)
